

FLAKE ICE MACHINES

SEA WATER

FLAKE ICE MACHINES SEA WATER

Capacity Range
2.000 kg/24h to 10.000 kg/24h

This on board type ice machines can tolerate shake and wobble of the fishing boats and are specifically designed to withstand marine conditions which causes corrosion.

Produces ice with sea water and it's condenser is also cooled with sea water.

- Ice generator with water-cooled condenser as standard, also available as optional with air-cooled condenser.
- Including control panel and sea water pump
- Ice blade and Ice generator drum are made of stainless steel
- Chassis is made of stainless steel
- Fitted with semi-hermetic or screw compressors.
- Refrigerant R404a, R507a or R22
- High condenser and fan capacities are tested under extreme conditions.

5.000 Kg/24h

7.500 Kg/24h

Model Name	Ice Capacity (Per Day)	Cooling Capacity	Compressor Displacement	Compressor Power	Weight
SFM 30	3000 kg/24h	18750 watt	75 m ³ /h	20 HP	690 kg
SFM 50	5000 kg/24h	30200 watt	129,1 m ³ /h	30 HP	1300 kg
SFM 75	7500 kg/24h	50000 watt	222 m ³ /h	60 HP	1600 kg
YSFM 20	2000 kg/24h	13100 watt	56 m ³ /h	12 HP	1000 kg
YSFM 50	5000 kg/24h	30200 watt	129,1 m ³ /h	30 HP	1300 kg
YSFM 100	10000 kg/24h	60400 watt	258,2 m ³ /h	2x30 HP	2500 kg
