

MOBILE MORGUE UNITS

MOBILE MORGUE UNITS

Capacity Range
4 Cadaver to 24 Cadaver

The Mobile Morgue Unit is designed to provide suitable conditions for keeping the corpse in it. It is manufactured with insulation.

It has 6 doors and a total capacity of 24 corpses, with 4 corpses in each section. Doors are insulated to prevent heat transfer.

There is a life (motion) sensor on the unit against revival. There is an information board (name) above their doors.

Termodizayn Mobile Morgue Unit has a hermetic compressor and has the feature of keeping the environment in which the body is placed to cool between -2°C and +5°C.

The stretchers in the cabins of the Termodizayn Mobile Morgue Unit are stainless and sliding. Trays have a carrying capacity of 125 kg. It works independently and when pulled up to 1/3, there is no need to keep it external.

Model Name	Number of Door	Cadaver Capacity	Chassis	Dimensions (WxLxh)
